

DONJON AWARDED \$6 MILLION IMTT DREDGING CONTRACT

BAYONNE, NJ — Donjon started work today on a \$6,000,000.00 contract it was awarded to perform maintenance dredging and upland disposal of approximately 24,000 cubic yards of dredged material at the International-Matex Tank Terminals (IMTT) facility in Bayonne, New Jersey.

The IMTT Bayonne facility is a critical hub supporting energy and chemical bulk liquid transfers throughout the New York and New Jersey harbor region. The terminal's berths are serviced by the Kill Van Kull channel, which is maintained by the U.S. Army Corps of Engineers (USACE).

“We’re proud to support IMTT’s environmental and operational goals while helping maintain the navigational infrastructure that this region’s supply chains depend on,” said Donjon Executive Vice President, Thomas D. Witte.

Despite the active dredging and marine construction work, IMTT terminal operations remain fully active, continuing to support bulk liquid shipments and barge transits through the New York and New Jersey harbors without interruption.

Donjon’s award underscores the company’s ongoing role in supporting critical maritime infrastructure and environmental compliance efforts throughout the New York and New Jersey harbor region.

About Donjon Marine

Donjon provides marine dredging, salvage, heavy-lift, towing, demolition, and related maritime services throughout the New York and New Jersey harbor region and beyond, supporting critical infrastructure, environmental compliance, and navigational safety projects for public- and private-sector clients.
